Who is the Data Controller?

MC TRANS SA
Via Vite 5
CH - 6855 Stabio, Switzerland
Phone: +41 91 695 46 70
Mail: info@mctrans.com
Website: www.mctrans.com

What are they doing?

Cookies are small text files that the sites visited by users send to their terminals, where they are stored to be then retransmitted to the same sites at the next visit. Cookies are used for different purposes, have different characteristics and can be used by the data controller of the site that is visiting, or by third parties. For more information on cookies, please visit www.allaboutcookies.org.www.allaboutcookies.org

The following information is provided on the cookies installed through this site and the information necessary to manage your preferences.

The current legislation provides that we can store cookies on your device if they are strictly necessary for the operation of this website. To install all other types of cookies and process the personal data collected through them, we need your consent. Please note that, if provided, your consent applies to the following domain:

EXEMPIS OF ANALOGUESE TECHNOLOGIES

The tracking of online navigation of users can also be done with technologies like cookies. Below are some examples.

Local storage

is a technology used to optimize navigation, which does not collect data on user-savvy preferences (e.g. stores a code that identifies the user session after login, to prevent the user from entering username and password on each profile page in access to the reserved areas.

Tracking pixels

“Tracking code” or “Tracking code”, is for the very first part of a code that is released by some systems with the aim of being implemented in others to track some data relating to the user and his browsing session or opening emails, in a totally transparent way to the user. The data that is being tracked can be the most

different, such as day and time, geographical location, type of device adopted for navigation, until you arrive in the most complex tracking pixels to monitor the value spent for a purchase order and other useful information for the marketing departments of the companies that use them.

Plugin

It is a software that interacts with another program to expand or extend its original features. The most used plugins are those of social networks, which allow for e.g. to the user to follow a page or social profile with a click that has liked a web content and share it on their social network profile, etc.

Widget

is a graphical user interface component of a program, which aims to facilitate user interaction with the program itself. The most widely used widgets are those of social networks, which allow users to easily open social networks in a separate browser window.

These services allow interactions with social networks, or with other external platforms, directly from the pages of a site. The interactions and information you may have acquired from the site are subject to the privacy settings of the third party that has created the technologies above. To receive detailed information pursuant to art. 13 of the Personal Federal Act on Data Protection, regarding the use of personal data processed when using these technologies, we invite you to visit the websites of third parties managers of these technologies.

What are social plugins and how they are used

You can use the social plugins listed below:

- Facebook; Facebook Inc. (1601 S. California Ave, Palo Alto, CA 94304, USA)
- Twitter; Twitter Inc. (795 Folsom St., Suite 600, San Francisco, CA 94107, USA)
- LinkedIn; LinkedIn Ireland Unlimited Company (Wilton Place, Dublin 2, Irland)
- YouTube, YouTube LLC (901 Cherry Ave., San Bruno, CA 94066, USA)

Social plugins are used to further customize the Internet pages. They are marked with the logo of the respective bidder. On the Internet pages, the plugins are disabled by default and therefore do not send data to social networks.
When the plugins are activated, the browser establishes a direct link with the servers of the respective social network as soon as you call our website. The content of the plugin is transmitted from the social network directly to your browser and from here integrated into the website. Through the integration of the plugins, the respective bidder receives the information that your browser has recalled the corresponding page of our website, even if you do not have an account of this social network or at that time you have not logged in. This information (including your IP address) is transmitted from your browser directly to a server of the provider (mostly in the United States) and saved there. We therefore have no influence on the extent of the data collected by the provider through the plugin. If you have logged in to the social network, this may associate your visit to our website directly to your user account. If you interact with the plugins, the corresponding information is transmitted directly to a server of the provider and stored there. In addition, information is published on the social network and may also be shown to other users. The provider of social networks may use this information for advertising, market research purposes and to configure the respective offer in a manner that suits the needs. For this purpose, user profiles, interests and relationships may be created, for example to analyse your use of our website in view of advertising that will be shown on

social networks, to inform other users of your activities on our website and to provide other services related to the use of social networks. To know the purposes and extent of data collection and further processing and use of data by social network providers, as well as your rights in this regard and the possibilities for setting up your private sphere, please consult directly the data protection information of the respective bidder. If you do not want the provider of social networks to associate the data collected through our website to your user account, you must logout from the social network before the activation of the plugins. For the processing of the data described, the legal basis is the legitimate interest.

COOKIES MANAGEMENT

Remember that you can manage your cookie preferences even through your browser.

If you do not know the type and version of browser you are using, click on "Help" in the browser window above, from which you can access all the necessary information. If you know your browser, go to the cookie management page. Users can, for example, find information on how to manage Cookies in some of the most popular browsers at the following addresses.
